April 21, 2016
**An Automated Method for Collecting Metrics**
Presenter: Kori Haynes, Crane Aerospace

**Abstract**: There are various ways to collect and analyze metrics within DOORS. Metrics automation based on a foundation of standard processes, methodologies, tools, and environment provides a tremendous improvement in the objectiveness, cost, and accuracy of metrics. This presentation will focus on how Crane Aerospace has standardized and automated the metrics collection process to provide commonality between programs and functional teams.

**Exploring Navigation in DOORS Next Generation**
Presenter: Ed Gentry

**Abstract**:  Being a wed-based solution, DNG offers a great deal of flexibility in navigating the various capabilities.   For people who were accustomed to the DOORS 9 user interface, DNG may not have appeared initially as intuitive as it

actually can be.  The speaker will walk through the navigation of dashboards, artifacts, modules, project areas and more to show how easy it is to drill down to the information that is of most interest.

**DOORS 101:  An Introduction to DOORS 9.6**
Presenter: Rick Learn, IBM

**Abstract**:The DOORS 101 presentation and demonstration will give you a good foundation and understanding of the overall versatility of DOORS.  Key capabilities will be reviewed to show how to establish a comprehensive requirements management environment. You will learn how to import information into the DOORS database, create custom attributes and create custom views or reports.  Creating links between associated information and then being able to create traceability or impact analysis reports will be discussed and demonstrated.

**Rational Publishing Engine (RPE) for Custom Reports across the Lifecycle (DNG, RQM, and Rhapsody)**
Presenter: Don Cunningham, IBM

**Abstract**:  Many DOORS users have realized that creating custom reports for DOORS using Rational Publishing Engine that can be re-used has been a huge boost in productivity.  Come and learn how you can take that a step forward and create custom reports from various sources across the lifecycle.  Examples of creating reports pulling data from DOORS, Rhapsody, and RQM will be explored and demonstrated.

**Customizing DOORS and Web Access to Speed up Reviews and Save Lives**
Presenter: Cliff Sadler, Senior Engineer, Brockwell Technologies (US Army AMRDEC)

**Abstract**: Have you ever had an aggressive timeframe to get a product upgrade developed, prototyped, tested and manufactured?After working on several DOORS programs for the US Army, it became apparent that defining a standard way of using DOORS for all stakeholders to compress their review and comment cycle, while reducing or eliminating surprises was critical.  The presenter will share ways they have accomplished a standard way to address their various program challenges while involving all stakeholders.
